OFFERS & FUNNELS

We paused our ads after one week.

The leads came in. They weren't the right fit. Here's what we changed.

INSIDE

1 What happened

2 Filter in the ad itself

3 No comparisons with cheap tools

4 Owners who already want software

5 Fewer, better leads

Sukeshwar R K · Co-founder, Bizzzauto

What happened

First lead on day one. By day seven, lead quality wasn’t where it needed to be, so we paused the spend.

Filter in the ad itself

The creative says who it’s for, including the size of business it suits.

No comparisons with cheap tools

Comparing ourselves to ready-made software pulls in people shopping on price.

Owners who already want software

Convincing someone they need a system is a different sale. We help owners choose who builds it.

Fewer, better leads

A short list of the right owners beats a long list of the wrong ones.

THE LESSON

More leads isn't the goal. Right conversations are.

1. Filter in the ad itself
2. No comparisons with cheap tools
3. Owners who already want software
4. Fewer, better leads

Ever paused something that was "working"?
