WHERE BUSINESSES LEAK MONEY

# I only hear about problems when customers complain.

5 problems a system can catch before your customer does.

✕ BEFORE → ✓ AFTER

Swipe

# The reply that never went out

✕ BEFORE

The customer follows up, annoyed.

✓ AFTER

Every first reply is **time-stamped**, so an unanswered enquiry stands out.

# The job running late

BEFORE

The customer asks where it is.

AFTER

Every stage has **a due date**. Late work is flagged before anyone asks.

# “I never got it”

**BEFORE**

Three people scroll through WhatsApp.

**AFTER**

The record shows **what was sent, and when**.

# The line that went quiet

**✕ BEFORE**

No messages come in, and nobody notices for hours.

**✓ AFTER**

Monitoring **alerts the team when a line or phone goes quiet**.

# The promised callback

✕ BEFORE

Promised on Monday. Forgotten by Tuesday.

✓ AFTER

It **comes back to the right person** on the right day.

BEFORE AND AFTER

# Customers shouldn't be your alarm system.

| BEFORE | | AFTER |
|---|---|---|
| Unanswered enquiry | → | Time-stamped replies |
| Late job | → | Due dates, flagged early |
| "Never got it" | → | A record of what was sent |
| Silent line | → | Monitoring alerts |
| Forgotten callback | → | Callbacks come back |
