WHERE BUSINESSES LEAK MONEY

“Every staff member keeps data their own way, so nothing matches at month end.

5 fixes for data that won’t add up.

✕ BEFORE → ✓ AFTER

Swipe

Customer names

✕ BEFORE

The same customer saved five different ways.

✓ AFTER

One record per customer, with a duplicate check on entry.

Status

✕ BEFORE

“ok”, “done”, “fine”, “pending?”

✓ AFTER

Fixed stages, so a status means the same to everyone.

Old data

BEFORE

Imports that scramble Tamil names.

AFTER

An import that **keeps Tamil names intact**.

Copies

✕ BEFORE

Each person’s own Excel file.

✓ AFTER

One system, the same fields, no copies to merge.

5 OF 5

Month end

✕ BEFORE

Three days of matching.

✓ AFTER

Totals that match, because **they come from one place**.

BEFORE AND AFTER

Clean data isn't a cleanup. It's a system that won't take the mess.

BEFORE		AFTER
✕ Five spellings	→	✓ One record, duplicate check
✕ Free-text status	→	✓ Fixed stages
✕ Scrambled imports	→	✓ Tamil names intact
✕ Personal Excel files	→	✓ One system
✕ Month-end matching	→	✓ One source
