WHERE BUSINESSES LEAK MONEY

“Nothing moves until I say OK, so approvals pile up on my phone all day.

5 places work waits for the owner, and how a system takes the owner out of each.

✕ THE WAIT → ✓ THE FIX

Swipe

Payments

✕ THE WAIT

Nobody starts the next step until someone confirms the money came in.

✓ THE FIX

A payment gate: **the next stage unlocks the moment the payment is marked received**.

Client approvals

✕ THE WAIT

A design, a script or a set of photos sits in a WhatsApp thread waiting for a yes.

✓ THE FIX

A client link: **the client approves in their own gallery or portal**, and the approval is recorded.

Reminders

✕ THE WAIT

Staff wait to be told, so the owner becomes the alarm clock.

✓ THE FIX

A reminder ladder: **it chases the right person first**, and reaches the owner only if the work is still stuck.

Status questions

✕ THE WAIT

“Where’s my order?” Only one person knows, and it’s the owner.

✓ THE FIX

Named stages: **every job shows where it is**, so anyone can answer.

WAIT 5 OF 5

Handoffs

✕ THE WAIT

Work finishes in one department and nobody tells the next one.

✓ THE FIX

One owner per stage: **when one stage is done, the next one starts on its own**.

THE 5 WAITS, FIXED

Your phone shouldn't be the system.

THE WAIT		THE FIX
✕ Payments	→	✓ **Payment gate**
✕ Client approvals	→	✓ **Client link**
✕ Reminders	→	✓ **Reminder ladder**
✕ Status questions	→	✓ **Named stages**
✕ Handoffs	→	✓ **One owner per stage**
